 1.0 **DESCRIPTION**

The ENDEVCO® Model 773 is a Tri-axial low g DC Accelerometer that utilizes unique variable capacitance microsensors. This Accelerometer is designed for measurement of relatively low level accelerations in automotive ride quality, motorsports and high speed rail applications where measurement of whole body motion immediately after the accelerometer is subjected to a shock motion and in the presence of severe vibrational inputs is required. 773 meet the requirements for IP67.

The 773 Accelerometer is available with a choice of two power options. One option (U) allows for operation from 7V to 36V. The second option (R) allows for operation at a regulated excitation voltage of 5V. The Accelerometer features various full scale g ranges including $\pm 2g$, $\pm 10g$, $\pm 30g$, $\pm 50g$, $\pm 100g$, $\pm 200g$, and provides single-ended output with a 2.5V output bias voltage.

 2.0 **ELECTRICAL CHARACTERISTICS**

All specifications assume $+75^{\circ}\text{F}$ ($+24^{\circ}\text{C}$), +5 Vdc excitation (for 773-XXX-R-ZZZ) or +15 Vdc excitation (for 773-XXX-U-ZZZ) unless otherwise stated. The following parameters are 100% tested.
